

Certificate of Participation

Dr. sc. nat. Alejandro Guerrero López

has successfully participated in the course

Narration and storytelling for persuasive academic presentations

28.09.2026

05.10.2026

at the University of Zurich, Graduate Campus

Instructor: Dipl. Betr. Oec FH Michael Berndonner

Course objectives

The course participants:

- know structures and blueprints for using narrative elements and storytelling in scientific speeches.
- are able to use these structures to develop their own, individual and authentic narrative style in a scientific context.
- critically deal with storytelling and narration in the scientific context and recognize from this discourse, which conditions must be met in order to achieve a desired effect with ST@SS©.
- train linguistic and speaking strategies that enable them to achieve a desired and conscious effect on the audience or communication partner and receive individual feedback.
- recognize the connections and dependencies of the system voice - body - content and effect.
